How to schedule your time to manage all your work.

- 3-4-hr day practice — Problem solving topic wise

- 2-hr contest + 1-2 hr upsolving

Must do things

- To improve C.P — 4-7 contests a week with upsolving.

- To improve Data Structure : Try first 10-15 easy problem aim to achieve in 1-2 days then do 10 medium problem & 5 Hard problems per topic then never do this topic in topic wise practice.

- To prepare for interviews : Always make notes for all stuff you think is important. 👓
    - do 2 contests a day with upsolving & do lots of company based question, take mock interview tests.

I can't solve more than 2.3 question a day?

→ Timings for every question you should give.

   Easy — C form A— 10 - 15 min

   Medium — B, C — 30 mins

   Hard — D & above — 1 hr max

Where to Practice

1) Leet code ⎫
2) Interview bit ⎬ Interview Prep
3) Greeks for Geeks ⎭

4) C plus plus ⎫ for STl and other data structures
5) Geeks for geeks ⎬ and concepts.

                   — virtual too
6   Codeforces *⎫
7   Code chef ⎬ Contests & random practice
8   At coder ⎭

9)   Code digger ⎫
10)   Leetcode ⎬ topic wise practice.
11)   Hacker rank
12   Spoj

Code digger Introduction

features

- Topic wise ladder
- Random question ladder
- Consists of 4 top class site Cf. ec spoj & UVA
- Video tutorial before starting topic.
- Easy to Hardest topics.

Motivation

- Why you should not leave C.P when you are bad in it.

- What advantage it gives you in Interview.
